

Dear Colleagues,

On behalf of **Fondazione Internazionale Menarini**, the President Dr. **Alessandro Casini** has the privilege and the pleasure to invite you to participate in the International Congress: **E-Health in Revolution, with special reference to Cardiology**.

The workshop will be conducted with the contribution and experiences of eminent and worldwide recognized experts of the cardiovascular field, academia, health care, industry and IT.

It will provide an opportunity to share and debate the most innovative and revolutionary improvements in e-Health, with the aim to strengthen the multidisciplinary dialogue in Medicine and Healthcare.

Fondazione Internazionale Menarini is proud to promote this international convention of scientific excellence and in doing so, bring it's cultural values to Ireland.

The President  
*Dr. Alessandro Casini*

*International Congress*  
**eHealth in  
Evolution**  
with special reference  
to Cardiology

**September 15<sup>th</sup> - 17<sup>th</sup>, 2016**  
**Dublin Castle (Ireland)**

President of the Meeting:

Prof. Ken McDonald - Heart Failure Unit  
St Vincent's University Hospital Dublin, Dublin (Ireland)

Organized by:

Cardiology, St Vincent's University Hospital

The Heartbeat Trust, supported by the Menarini Foundation are pleased to invite you to our "eHealth in Revolution" event taking place on 15<sup>th</sup> - 17<sup>th</sup> September 2016 in Dublin Castle.

This event brings together national and international leaders from the disciplines of healthcare, IT, government and industry; to provide the broadest overview of the challenges of eHealth, as we attempt to use this tool in reshaping how healthcare can be delivered.

The IT sector has the capacity to revolutionise healthcare delivery worldwide. A large proportion of patients can now be treated in their home environment with access to expert medical care through the medium of telecommunications, enabling cost effective primary care. eHealth's role in clinical care, medical education, research, and training in the healthcare sector continues to expand rapidly.

Speakers from around the globe will present at this important event. The opening lecture entitled eHealth: Where we are now? Will be delivered by Prof. Josip Car, Director of Global eHealth Unit, Imperial College London. Richard Corbridge, Chief Information Officer will present on behalf of the Health Service Executive and Ms Deidre Keeves, Health IT Adoption & Engagement, UCLA will participate and deliver her presentation on Leveraging Technology for Patient Engagement.

Lectures from industry and policy makers will be interspersed with clinical and user views of real world applications.

I hope you will be able to accept our invitation to attend what promises to be a very informative event.

Meeting Director  
*Prof. Ken McDonald*

## WHAT IS FONDAZIONE INTERNAZIONALE MENARINI?

It is a non-profit institution established in spring 1976, in Florence, with the aim of praiseworthy cultural and educational purposes. The Foundation's primary vocation is to promote and to support own or third-party initiatives in order to spread and improve knowledge and education in many different areas such as medical science, social-human science, research, economy, art and environmental fields. The main instrument to achieve its goals is through the organisation of international congresses addressing different disciplines and specific medical needs, CME/EBAC/EACCME accredited training courses involving leading international Scientists and Universities and many other cultural events.

## 40 YEARS OF ACTIVITY

**350 Conventions and Conferences, in Italy and around Europe,** to promote knowledge and sharing cultures and experiences between the top International Key Opinion Leaders and other interested people for a real social and civil human progress.

## COLLABORATION WITH NOBEL PRIZE WINNERS:

**CARL FERDINAND CORI** (Physiology or Medicine in 1947);  
**FEODOR LYNEN** (Physiology or Medicine in 1964);  
**ULF S. VON EULER** (Physiology or Medicine in 1970);  
**RENATO DULBECCO** (Physiology or Medicine in 1975);  
**CARLO RUBBIA** (Physics in 1984);  
**RITA LEVI MONTALCINI** (Physiology or Medicine in 1986);  
**LOUIS J. IGNARRO** (Physiology or Medicine in 1998);  
**FERID MURAD** (Physiology or Medicine in 1998);  
**PETER AGRE** (Chemistry in 2003);  
**LUC MONTAGNIER** (Physiology or Medicine in 2008).

It gives us great pleasure to bring our experience to Ireland addressing the "state of the art" for e-Health in different medical fields and healthcare sectors. We ensure the meeting will be highly productive, we welcome your interactive contributions for the improvement and understanding of this complex and rapidly evolving area of interest.
