

Course on Molecular and Statistical Genetics of Consanguinity

13-16 May, 2012

EuroMediterranean University Center of Ronzano- Bologna (Italy)

Directors:

L. L. Cavalli-Sforza (Milan, Italy), C. Cannings (Sheffield, UK), G. Romeo (Bologna, Italy)

13 May Sunday

Morning Session: Basic theory on kinship, inbreeding and IBD : applications to medicine

8:00- 8.30	Course Registration
8.30- 8. 40	G. Romeo Introduction to the course
8.40- 9.30	L.L. Cavalli Sforza: Demography and population genetics of consanguinity
9.30- 10.20.	A. Bittles Consanguineous marriage: facts versus fiction
10.20-11.30	C. Cannings The Basic Theory of Inbreeding; Genes, Chromosomes, Genealogies.
11.30-11.40	Coffee Break
11.40-12.20	P. Gasparini The use of genetic isolates to dissect complex and quantitative traits: the advantage of a National network of inbred populations
12.20- 13. 00	A. L. Leutenegger Unexpected findings in Taybi-Linder syndrome/MOPD1 : an illustration of homozygosity mapping by genomic control
13.00-14.00	Lunch Break and tour of the Hermitage of Ronzano
14.00-14.30	Posters Viewing Session

Afternoon Session: 2 rounds of Concurrent Workshops 14.30-18.00

A.L. Leutenegger t.b.d

P. Gasparini t.b.d

D. Teare basic data handling and analysis using PLINK

A. Boattini t.b.d

T. Pippucci t.b.d

14 May Monday

Morning Session: Molecular approaches (population inbreeding studies, inferring relationships from GWAS or sequencing data i.e.: runs of homozygosity).

9.30- 10.10	F. Cucca The Sardinia project
10.10- 10.50	Y. Aulchenko Modern methods for association analysis of complex traits in genetically isolated populations
10.50-11. 20	Coffee Break
11.20-12.00	P. Gasparini Consanguinity and next generation sequencing to identify genes for inherited diseases
12.00-12.40	A.L. Leutenegger t.b.d and/or D. Teare Overview
12.40-14.00	Lunch
14.00-14.30	Posters Viewing Session

Afternoon Session: 2 Rounds of Concurrent Workshops 14.30-18.00

P. Gasparini t.b.d	
A. Boattini t.b.d	
T. Pippucci t.b.d	
Y. Aulchenko	GWA analysis in genetically isolated populations using GenABEL suite

15 May Tuesday

Morning Session: NGS and gene identification for Intellectual Disabilities

9.00- 9.40	H.H. Ropers
09.40- 10.30	Y. Aulchenko Computational and methodological challenges in analysis of omics data
10.30-11. 00	Coffee Break

11.00-11.40 H. Hamamy **Genetic counseling and consanguinity**

11.40-12.00 D. Teare t.b.d

12.00-12.40 **Best Posters presentations by students**

12.40- 13.40 **Lunch**

Afternoon Session: 2 Rounds of Concurrent Workshops 14.30-18.00

A.L. Leutenegger t.b.d

P. Gasparini t.b.d

D. Teare t.b.d

Y. Aulchenko **GWA analysis in genetically isolated populations using GenABEL suite**

16 May Wednesday

Morning Session: Future research directions in the consanguinity field (with particular emphasis on gene identification for Intellectual Disabilities)

9.00- 09.40 C. Cannings

09.40- 10.20 D. Teare **Epidemiological associations between disease risk and inbreeding**

10.20-10. 40 **Coffee Break**

10.40-11.20 A. Bittles **Consanguinity and developmental intellectual disabilities**

11.20-12.00 H. Ropers

12.00-12.40 G. Romeo **New perspectives for consanguinity studies**

12.40-13.20 **Short presentation of the EU Cherish Project (Project Grant Agreement N°223692)**

13.20 **Lunch and departure**
